

Illustrations of Dissections in a Series of Original Colored Plates; The Size of Life, Representing the Dissection of the Human Body Volume 1 (Paperback)

By George Viner Ellis

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1882 edition. Excerpt: .16. Inferior maxillary nerve. 17. Large petrosal nerve. English anatomists reckon in general nine pairs of cranial nerves, and the anatomists on the Continent enumerate twelve pairs; so that some confusion in the nomenclature arises from this difference in the mode of numbering. The enumeration of the nerves as twelve appears most natural, as only two nerve The olfactory, or first cranial nerve, is marked by a bulb which rests on the cribriform plate of the ethmoid bone, and sends filaments to the nose through the subjacent apertures: it will be found attached to the brain. The optic, or second nerve, 2, ends in the eyeball. Posteriorly the nerves of opposite sides unite in a commissure (chiasma) on the olivary eminence of the sphenoid bone, with a partial decussation of their fibres. In front the nerves diverge; and each issues from the skull through...

Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).

-- Prof. Kirk Cruickshank DDS

This kind of book is every little thing and taught me to looking ahead of time and a lot more. I am quite late in start reading this one, but better then never. I found out this book from my dad and i encouraged this pdf to find out.
