Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1893 Excerpt: . he had left, after which he had 80 turkeys. How many had he at first? 44. A merchant gained of his capital the first year, and f of that amount the second year. The third year he lost- of all his money, and found that he had \$1200. What was his original capital? LESSON II. 1. Divide 92 into two parts, so that f-of the first--12, shall equal the second. Solution: The first part is f, the second is--12. The sum is of the first--12, which= 92. Then /-of the first= $92+12= 104$. $i=8$, $1=64$. $f--12=28$. Answer: 1st, 64; 2d, 28. 2. Divide 120 into two such parts, that f of the first--1 shall = the second. 3. Divide 100 into two parts, so that f of the first + 4 shall= the second. 4. Divide 140 into two parts, so that of the first...
