When we realize the extraordinary development of modern experimental biology, it would be rash to say that the problem of the origin of life is insoluble, but it must be admitted that its solution does not seem to lie in the immediate future. Life and Its Origin. - All living things are built up of chemical elements that also occur in an inorganic condition; and the nature of the combinations of these elements into the substances that make up living matter, and the functions or life processes associated with this living matter, are the problems with which the biologist has to deal.
