By Steven C. Hatch

ATLANTIC BOOKS, United Kingdom, 2016. Hardback. Book Condition: New. Main. 224 x 150 mm. Language: English . Brand New Book. There s a running joke among radiologists: finding a possible tumour in a mammogram, they say, is akin to finding a snowball in a blizzard. The result? Up to 30 of breast cancer surgeries are done on those who have no cancer at all. In this landmark book, medical professor Steven Hatch reveals that although modern medicine has reached new levels of scientific prowess, we know far less than we think we do. Indeed, CAT scans, MRIs, Mammograms, and blood tests provide a wall of data where false positives are rife. Thus, to be a good doctor, surgeon, or psychiatrist, it is just as important to know what one doesn t know, as what one does. Covering everything from the efficacy of Prozac to the regular barrage of health advice by the media (e.g. bacon causing cancer), Hatch shows why it s essential that doctors and their patients know how to interpret data. A drug that might be very effective to a certain cohort of patients suddenly becomes little more than a placebo when given to large bodies of the...
